

AWHONN Intermediate Fetal Monitoring Course

This course addresses principles of fetal heart monitoring and may be used as a knowledge assessment tool to validate the comprehension of experienced perinatal clinicians. This course includes lectures and hands-on skill stations, including performing Leopold maneuvers, placement of an intrauterine pressure catheter and fetal spiral electrode, interpretation of fetal monitoring tracings using a case-based approach, identification of physiologically based clinical interventions, and communication and risk management principles. This course can be used to support preparation for certification examinations. There is a recommended renewal date every two years for the Intermediate Fetal Monitoring Course.

Learning Outcomes:

- Interpret fetal heart rate monitoring using NICHD terminology within a safety culture framework of interdisciplinary teamwork
- Describe clinical interventions and related maternal-fetal physiology to optimize fetal oxygenation
- Demonstrate collaborative communication in the perinatal setting
- Demonstrate common perinatal procedures related to fetal monitoring

Course Format:

Successful completion of online prerequisite education is required prior to attending the one-day in-person portion of the course.

- Prerequisite online learning approximately 3-4 hours, must be completed 48 hours prior to the start of class
- In-person is eight hours and includes time for lunch and breaks
