orientation, gender identity, or associational
preference. The University also affirms its
commitment to providing equal
opportunities and equal access to University
facilities. For additional information contact
the Office of Equal Opportunity and
Diversity, (319)335-0705.

PICU Power Hour: Vascular Access Team: Did You Know...?

Purpose:

The Pediatric Intensive Care Unit (PICU) Education Committee has collaborated with interdisciplinary experts to identify relevant educational topics and issues that affect the way nurses care for patients who are critically ill. Best practice, research and evidence-based practice literature will provide the foundation for all discussion. The format for this education series ranges from classroom lecture to simulation of patient care.

Objectives:

1. Describe the role of the CWS Vascular Access Team (VAT)
2. Discuss peripheral intravenous catheter assessment, documentation, and peripheral intravenous infiltration and extravasation (PIVIE) interventions
3. Identify the different types of vascular lines and their indications, care and maintenance
4. State the indications for vascular lines and placement based on cardiac and renal diagnosis (MiniMAGIC guidelines)
5. Discuss recent data related to ultrasound guided peripheral intravenous (USGPiV), PIVIE, pressure injuries under catheters and future initiatives

Schedule:

1745/1945

Welcome and Introduction

Karr Kephart, BSN, RN, CCRN
Staff Nurse, SFCH L3

1750/1950

Overview of the VAT and vascular line care

Grayce Kerr, RN, BSN, CCRN
