356-1238.

8th Annual Iowa Association of Air Medical Services (AAMS) Safety Symposium 2020:

Purpose:

The Annual Iowa AAMS Safety Symposium is designed to deliver education content focusing on building a culture of safety for air and ground critical care transport in the state of Iowa and surrounding states. The seminar provides opportunities to discuss professional topics and multidisciplinary related patient and crew safety issues. This is to provide an opportunity for emergency medical services healthcare staff to also identify good catches, near misses, common errors in order to improve patient care and a culture of safety.

Agenda

- 0800-0900: Psychology of Survival – Azeem Ahmed
- 0900-1000: Oh No - They Didn't! Factors Associated With a Sentinel Event In the Face of Maintaining Patient Safety – Eric Bean
- 1000-1100: I'm Not Dead, Yet! - The Minnesota Mobile Extracorporeal Membrane Oxygenation (ECMO) Project – Kolby Kolbet
- 1100-1200: Creating a Culture of Accountability – Kolby Kolbet

Objectives

1. Identify the positive and negative effects of stress.
2. Define the survival stressors.
3. Name natural reactions to stressors.
4. Identify how to prepare yourself for survival stress.
5. Recognize human performance factors.
6. Incorporate AMRM (Air Medical Resource Management) principles into crew communication.
7. Discuss factors that affect decision making.
8. Apply the Just Culture principles to sentinel events.
9. Apply the 'accident' and 'crash' principles to patient safety.
10. Define ECMO/ECLS (extracorporeal life support).
11. Review the science that supports ECLS.
12. Provide a case study that illustrates the benefits of an ECLS program.
13. List the characteristics of a culture of accountability.
14. Recall the correlation between workplace culture and safety.
15. Describe the benefits of an accountable culture.
