Location: All classes held in the Nursing Clinical Education Center (NCEC), 4 West, General Hospital

PURPOSE

This workshop is designed to provide basic information for obstetrical nurses on the use of fetal monitoring in the care of patients. Discussion will include methods of fetal monitoring, recognition of changes and interventions to assist in the management of patients. Documentation issues and methods of antepartum testing will be included.

OBJECTIVES

1. Discuss external and internal methods of monitoring fetal heart rate and uterine activity.
2. Identify characteristics of fetal heart rate baseline and periodic and episodic changes using National Institute of Child Health and Human Development (NICHD) terminology.
3. Identify fetal heart rate patterns requiring interventions.
4. Review fetal heart rate patterns and uterine activity and discuss appropriate interventions.
5. Discuss documentation of electronic fetal monitoring.
6. Describe methods of antepartum testing for the evaluation of fetal well-being.

Individuals with disabilities are encouraged to attend all University of Iowa-sponsored events. If you are a person with a disability who requires an accommodation in order to participate in this program, please contact the Department of Nursing in advance at (319)356-1238.
