GENERAL INFORMATION

Purpose:

This workshop is designed to provide basic information for obstetrical nurses on the use of fetal monitoring in the care of patients. Discussion will include methods of fetal monitoring, recognition of changes and interventions to assist in the management of patients. Documentation issues and methods of antepartum testing will be included.

Nursing Credit:

5.4 contact hours will be granted by UI Hospitals & Clinics Department of Nursing (IBN Approved Provider #34).

Participants must attend the entire program to receive full credit.

Intended Audience:

Licensed nurses, providers and physicians.

Educational Objectives:

Upon completion of this program, learner should be able to:

- Discuss external and internal methods of monitoring fetal heart rate and uterine activity.
- Identify characteristics of fetal heart rate baseline and periodic and episodic changes using National Institute of Child Health and Human Development (NICHD) terminology.
- Identify fetal heart rate patterns requiring interventions.
- Review fetal heart rate patterns and uterine activity and discuss appropriate interventions.
- Discuss documentation and communication of electronic fetal monitoring.
- Describe methods of antepartum testing for the evaluation of fetal well-being.

To register after the deadline date, please call 319-356-1238 to find out if there is seat availability. Registration after the deadline may be declined if space is already filled.
